

Announcement

2nd Grid Service Markets Symposium

Call for Contributions
Exhibitors
Pre-REGISTER

Save the Date

5th July 2018

KKL, Lucerne Switzerland

www.EFCF.com/GSM

Focus:

European grid service-oriented technologies and markets: Conditions, Experiences & Rating

The **Electricity Market** is changing, opening opportunities for **more flexibility in generation, storage and consumption**. New **sustainable technologies** such as *Batteries, Fuel Cells, Water Electrolysers, Power to X, Demand Side Response DSR, and others* compete or complement each other in terms of technical capabilities and economic performance.

The **GSM-Symposium** aims to outline general and country specific **market conditions and solutions for grid services**. In addition, it reports on *experiences and success stories*, which support a *rating of the performance, and future potential* of new sustainable technologies. The international audience is interested in **market logic, regulations, future trends, long term business plans** and other business related aspects of European grid service markets.
